

OCTOBER 2024 MEDICAL CAMP OUTREACH **REPORT**

This impactful initiative was made possible through the financial sponsorship of Embrace Uganda, whose commitment to improving healthcare access in underserved communities enabled us to organize and deliver critical medical services to the people of Kadacar and the surrounding areas. African Church Empowerment Ministries coordinated the event, while Hands of Kindness Medical Center took the lead in implementing the outreach, ensuring that quality healthcare services reached those in need.

AIMS AND OBJECTIVES

- ✚ Provide quality health care services to the children
- ✚ Identify common conditions affecting the children.
- ✚ Minimize infant mortality rate.
- ✚ Extend accessible health care services to the children.
- ✚ Give back to the community and promote the love of God.

ACTIVITIES DONE

The outreach showcased a holistic approach to healthcare, combining education, prevention, diagnosis, and treatment. These activities were carried out in accordance with national health policies and guidelines, ensuring thorough care and effective management of various health conditions in the community

General Health Services:

Provided deworming for children, except those under one year old. Conducted laboratory tests for Malaria and Urinalysis, managing positive cases appropriately.

Dispensing: based on clinical officer prescriptions after diagnosis and testing was completed. As children received their medications, they were educated on proper usage and provided with advice on adhering to their treatment regimens.

Counseling: Counseling was tailored to address the specific needs of the children based on their medical conditions. For each condition, the focus of the sessions varied

Hair Cuts: Due to tinea capitis, we were grateful for Diana, a first-time team member from Embrace Uganda, who kindly donated funds to shave all childrens' hair.

AT 500 SHS = (\$LESS THAN 50CENTS)

ACTIVITIES DONE

Clerking and Diagnosis:
Our qualified clinicians recorded patient histories and diagnosed illnesses by following Ministry of Health guidelines.

Feeding
Fed 979 Children over the course of 3 days

Leadership Training

TESTS CONDUCTED

MALARIA

TOTAL TESTED **979**
POSITIVE **379**

URINALYSIS

TOTAL TESTED **64**
POSITIVE **18**

PREGNANCY

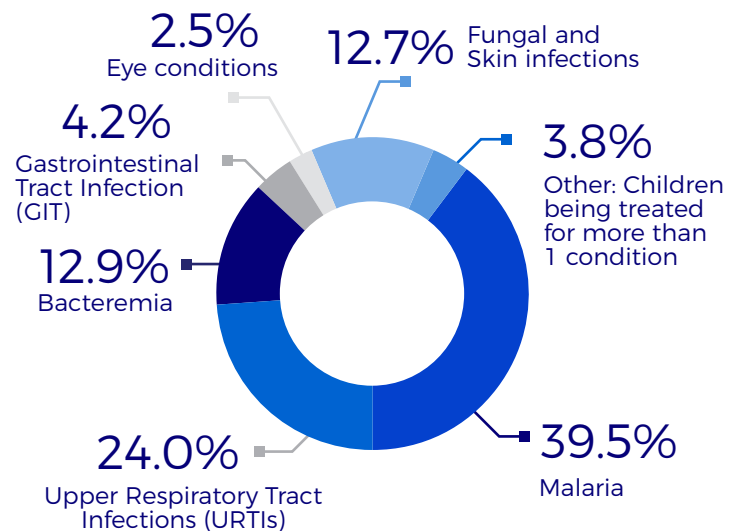

TOTAL TESTED **56**
POSITIVE **0**

TYPHOID

TOTAL TESTED **5**
POSITIVE **0**

These percentages below reflect the proportion of each condition among the total cases of 979 recorded during the outreach

CONDITION	TOTAL #
Upper Respiratory Tract Infections (URTIs)	235 (24.00%)
Bacteremia	127 (12.97%)
Gastrointestinal Tract Infection (GIT)	42 (4.2%)
Eye conditions	25 (2.55%)
Fungal and Skin Infections	125 (12.76%)
Other: children being treated for more than 1 condition	38 (3.88%)
Malaria	387 (39.53%)

CHALLENGE

The need to record each child's details by hand led to delays, especially when dealing with large numbers of children. Implementation of a digital registration system would significantly improve efficiency. Using tablets or laptops for electronic registration could streamline the process, reduce human error, and allow for quicker access to information.

Conducting urinalysis using a microscope, prolonged the waiting time for children and delayed the overall service delivery. Procuring a Urine Analyzer, which can provide results in just 2 minutes.

LEADERSHIP TRAINING

With support from Embrace Uganda, over 100 leaders, local civic, clan, and church leaders, who are very important persons in the day to day running of society, were empowered with leadership skills. The three-day training was conducted in Koreng Baptist Church in Kangole Sub county. The training included live streaming session facilitated by leadership coaches from the United States. Topics included qualities of a leader, the role of a leader, planning, and accountability.

The training was welcome and most of the participants wanted this to be a yearly event so that they can learn more and equip themselves for the leadership challenges of the 21st century.
